Experience

Palo Alto Networks — Jan 2020 — Current

Principal Security Consultant / Extended Expertise — Remote

- Security Transformation and Recovery: Lead the design and deployment of Palo Alto Networks security solutions to drive rapid security transformation for enterprise customers migrating to the cloud.
- Infrastructure as Code (IaC): Architect and deploy scalable security infrastructure using IaC across GCP, OCI, AWS, and Azure, ensuring that recovery environments adhere to Palo Alto Networks reference architectures and industry best practices.
- Trusted Advisory: Act as a primary technical advisor to customer account teams and stakeholders, identifying critical policy and technology gaps that enabled security breaches and developing holistic remediation plans.
- Cross-Functional Collaboration: Collaborate with internal engagement leads and diverse customer contacts, from technical admins to executive leadership, to communicate project status, mitigate risks, and ensure a cohesive post-incident security posture.
- High-Pressure Execution: Manage complex configuration and troubleshooting tasks in high-stakes environments, remaining composed and articulate while guiding customers through urgent security improvements.
- Agile Leadership: Designate and guide Agile processes for engineering teams to accelerate the delivery of secure, cloud-native infrastructure and mission-critical updates.

University of Colorado — Sep 2025 — Current

Lecturer — Denver, CO

- Guiding students through fundamental concepts of IT infrastructure, data management, and the role of information systems in modern business and technology.

Projects
