

Franklin Diaz

Principal Engineer

20+ years of Network and Security experience

Professional Profile

Professional Profile

Franklin Diaz is a results-driven Principal Engineer, security researcher, and educator with over 20 years of experience spanning telecommunications, software development, cloud security, and DevSecOps. Currently in his sixth year at Palo Alto Networks, Franklin serves as a Principal Extended Expertise Consultant, where he guides large-scale enterprise customers through complex cloud migrations, automation initiatives, and critical infrastructure transformations.

Alongside his corporate consulting, Franklin is a highly active member of the open-source security community and serves as an Adjunct Instructor at the University of Colorado Denver Business School, bridging the gap between industry practice and academic theory.

Skills

- NGFW configuration, implementation, and management
- Panorama design, implementation and migration
- User-ID design and large-scale implementation
- High Availability network design

Recent PAN Professional Experience

- Global pharmaceutical distribution company with over 203,000 employees in 27 countries
