Experience

University of Colorado - Denver
Sep 2025 — Current

Faculty Lecturer — *Denver, CO*

- Guiding students through fundamental concepts of IT infrastructure, data management, and the role of information systems in modern business and technology.

Palo Alto Networks
Jan 2020 — Oct 2026

Principal DevOps Engineer / Extended Expertise — *Remote*

- Multi-Cloud Architecture: Architected and deployed scalable, zero-trust cloud infrastructure solutions across AWS, Azure, GCP, and OCI adhering to enterprise reference architectures.
- Executive & Incident Advisory: Served as primary technical advisor to customer account teams and executive stakeholders, identifying critical architectural gaps, remediating breaches, and delivering post-incident recovery roadmaps.
- Infrastructure as Code (IaC): Designed and deployed modular Terraform automation and GitOps CI/CD pipelines across major public cloud providers.
- AI & Technical Enablement: Led weekly AI training initiatives on Prisma AIRS and AI-enabled workflows, educating cross-functional engineering teams on Google Gemini and modern foundation models.

Salesforce
Oct 2014 — Jan 2020

Security Detection Engineering — *Bellevue, Washington*

- Built high-throughput security telemetry collection systems processing over 1 billion security events per day across global enterprise infrastructure.
- Engineered and maintained analytical data pipelines in a FedRAMP High GovCloud environment on AWS.
- Developed distributed packet capture infrastructure, CI/CD automation, and integrated regression test suites across multi-repository toolsets.

Principal Research Software Engineer
Aug 2012 — Jan 2014

Security Engineer — *Indiana University, Bloomington IN*

- Test Architect in Software Defined Networking Lab, designed test cases and direct test efforts on openflow networks.
- Wrote web based tools for GENI/GEMINI project. Assistant instructor for undergraduate networking (lead discussions, create and grade homework, and proctor exams).
- Research very high capacity storage solutions and high speed network connections.

Nokia Siemens Networks
Apr 2011 — Jul 2012

Research And Development Engineer — *Espoo, Uusimaa, Finland and Arlington Heights, IL USA*

- CDMA Cellular base station product development.

Motorola - Cellular Networks and Space Sector
Jan 1998 — Mar 2011

Senior Software Engineer — *Arlington Heights, IL*

- Worked on and with customer accounts teams including Sprint, ALLTEL, Lucent, Pelephone, NTT, etc.
- Systems Integration and Test (part of various feature teams, product dev)
- CDMA base station development (C/C++)

Education

Bachelor of Science in Computer Science, *Roosevelt University* 2002

Master of Science in Information Systems, *Northwestern University* 2004

Master of Science in Computer Security, *DePaul University* 2007

Skills

Cloud Platforms	AWS, Azure, GCP (GKE, Cloud Functions), OCI
Infrastructure as Code	Terraform, Ansible
Containers & Orchestration	Kubernetes (AKS, GKE, EKS), Helm, Docker/Podman
CI/CD	GitHub Actions, CircleCI, Tekton
Scripting & Programming	Python (advanced), Bash (advanced), JavaScript/TypeScript, Go, SQL, PowerShell (proficient)
Databases	PostgreSQL, MySQL, MariaDB
Networking	SDN design, VNets/VPNs, DNS, load balancers, TCP/IP
Collaboration & Practices	Git, Jira, Confluence, Agile/Scrum
Automation & DevOps Ops	Ansible, Puppet, Chef, Kafka, Nginx, Logstash/ELK, Airflow

Activities

Gave a talk at Bsides Colorado springs Oct 2025
